

FreshLand Website Testing Defects/Bugs:

Bug 1: Delivery Choice Dropdown Icon Overlapping Text on Cart Page

Description:

On the cart page, the dropdown icon for the delivery choices (e.g., “One-time purchase,” “Every week,” “Every two weeks”) is overlapping with the text. The position of the icon is inconsistent—on desktop it overlaps, while on mobile view it displays correctly on the right side of the text.

This affects the clarity and readability of the dropdown options.

Steps to Reproduce:

1. Navigate to <https://dk-staging.vercel.app/cart>
2. Add a product to the cart
3. Go to the cart page
4. Observe the dropdown under each product for delivery frequency
5. Compare icon placement in desktop vs. mobile view

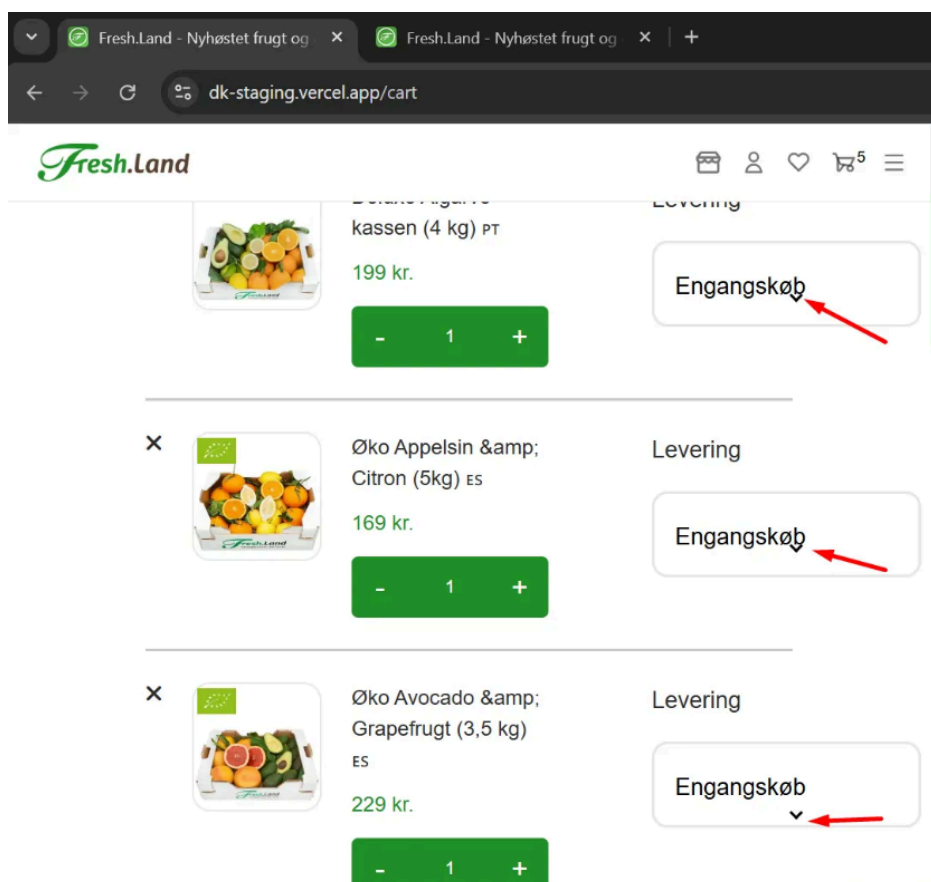

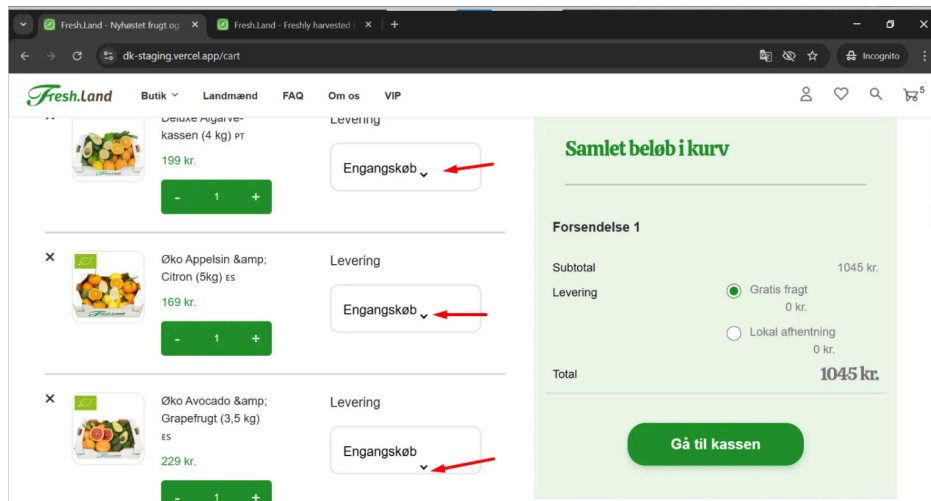

Website link:

<https://dk-staging.vercel.app/cart>

Expected result:

The dropdown icon should consistently appear on the **right side of the text**, without overlapping, across all screen sizes.

Screenshot or video:

Bug 2: Misaligned Text Position for “Gratis fragt, Lokal afhentning” on Checkout Screen

Description:

On the checkout screen at <https://dk-staging.vercel.app/>, the text “**Gratis fragt, Lokal afhentning**” is not aligned properly with the corresponding radio input. It is currently displayed **above** the radio button instead of beside it, making the layout look inconsistent and potentially confusing for users.

Steps to Reproduce:

1. Go to <https://dk-staging.vercel.app/checkout>
2. Scroll to the shipping method selection area
3. Observe the positioning of the “Gratis fragt, Lokal afhentning” label

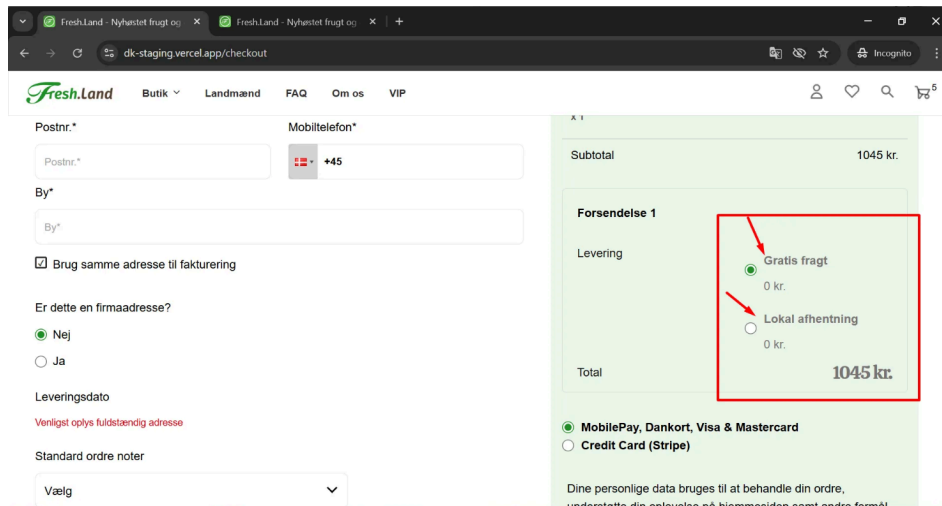

Website link:

<https://dk-staging.vercel.app/checkout>

Expected result:

The text should appear **horizontally aligned**, directly **in front of the radio input**, for a cleaner and more intuitive layout.

Screenshot or video:

Bug 3: Missing Focus State Color for “VIP” Page Title in Navigation

Description:

On the homepage of <https://dk-staging.vercel.app/>, when navigating through different pages, the **active page title** in the navigation menu changes its color to indicate the current page. This provides useful visual feedback to the user. However, this **focus/active color state is not applied** when selecting the “VIP” page. This leads to inconsistency in navigation feedback and may confuse users about which page is currently active.

Steps to Reproduce:

1. Visit the homepage at <https://dk-staging.vercel.app/>
2. Click through the different navigation links (e.g., Home, Shop, VIP, etc.)
3. Observe how the title text changes color when each page is active
4. Click on the “VIP” page and observe the title text

Website link:

<https://dk-staging.vercel.app/>

Expected result:

The “VIP” page title in the nav menu should also receive the **active/focus state color**, just like the other pages.

Screenshot or video:

Please take a look at the attached video:

<https://jam.dev/c/b912b2f4-1cbf-49a8-945b-5b82795b134e>

Bug 4: “Gift Card” Category Displays 0 Results from Shop Dropdown

Description:

On <https://dk-staging.vercel.app/>, the **Gift Card** product is clearly visible at the bottom of the homepage when scrolling through all available products. However, when selecting “**Gift Card**” from the **Shop dropdown list**, the product listing returns:

“0 results – Your search returned no results.”

This behavior is inconsistent and misleading, as it suggests there are no Gift Card items, even though they exist in the product list.

Steps to Reproduce:

1. Visit <https://dk-staging.vercel.app/>
2. Scroll to the bottom of the homepage and verify the presence of **Gift Card** items
3. Select “**Gift Card**” from the list
4. Observe the results section

Website link:

<https://dk-staging.vercel.app/category/Gavekort>

Expected result:

Selecting “Gift Card” from the Shop dropdown should display the available Gift Card product(s).

Screenshot or video:

Please take a look at the attached video:

<https://jam.dev/c/8564ef87-8ee7-474f-86cb-e9e4b08769b8>

Bug 5: Cart counter icon is not working properly

Description:

on home page-> user add item to cart, item added and counter increased to but the problem is that when navigate to all product page cart counter is going to zero which is wrong.

Website link:

<https://dk-staging.vercel.app/cart>

Expected result:

Cart counter should count numbering properly if user navigates to other pages

Screenshot or video:

Please take a look at the attached video:

<https://drive.google.com/file/d/1hpO2OMvX-fPxl-weXJx8ErRbIOGd910b/view?usp=drivesdk>

Bug 6: Console Errors When Attempting Google Login or Signup

Description:

On <https://dk-staging.vercel.app/>, upon first visiting the website and attempting to log in or create an account using **Google authentication**, multiple **JavaScript errors appear in the browser's console**. These errors may indicate broken or misconfigured third-party integrations, such as the Google OAuth flow, and can result in login/signup failures or degraded performance.

Steps to Reproduce:

1. Open the browser dev tools
2. Visit <https://dk-staging.vercel.app/>
3. Click the **Google login/signup** button
4. Observe the **Console tab** for any red error messages

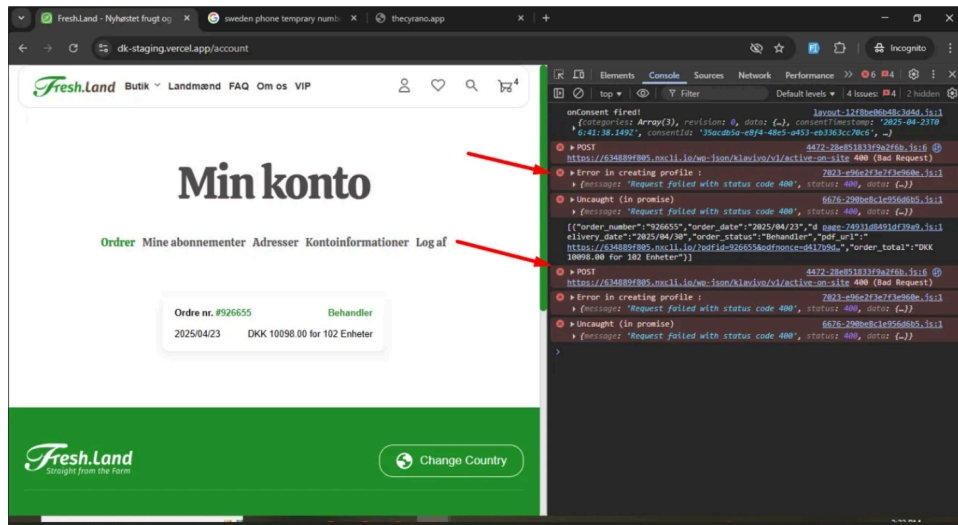

Website link:

<https://dk-staging.vercel.app/>

Expected result:

There should be **no errors** in the console when initiating the Google authentication flow.

Screenshot or video:

Bug 7: Order invoice pdf does not open

Description:

On checkout Page if user hits view invoice pdf file, Currently file does not open and gives error.

Website link:

<https://dk-staging.vercel.app/account>

Expected result:

invoice pdf should be open on the user end smoothly.

Screenshot or video:

<https://jam.dev/c/eb19f33b-f241-4ca9-aaef-eae3037b022d>

Bug 8: Login with google having issue

Description:

If the user login via google after entering email and password, the website navigates to the login page and then after some seconds then goes to the dashboard. So creating the same issue if the user logs out and then tries to LOGIN WITH GOOGLE.

Website link:

<https://dk-staging.vercel.app/account>

Expected result:

After successfully login with google website should navigate to dashboard not going login page firstly and than to dashboard

Screenshot or video:

<https://jam.dev/c/bbceb29c-b3d4-4a71-a059-27b6fa181909>

Bug 9: Approve order button does not work on first try

Description:

On the checkout Page, If the user fills out the required fields like delivery address, phone and other fields and then hits the place order button it is returning an error. If the user chooses to pick up your delivery locally, you must select a delivery location or choose another delivery method. and it will be working fine if the user changes the delivery option.

Website link:

<https://dk-staging.vercel.app/checkout>

Expected result:

The Approved order button should navigate to the card detail page.

Screenshot or video:

<https://jam.dev/c/b692f2d9-a151-4cb3-a07a-c6e99cb99ce3>

Bug 10: E-mail” Label Overlaps with Email Address on Order Confirmation Page (iPad Air View)

Description:

On <https://dk-staging.vercel.app/>, when viewing the **Order Confirmation page** on an **iPad Air device resolution**, the **“E-mail” label** overlaps with the **email address text**. This creates visual clutter and makes it hard to read the email clearly, resulting in a poor user experience on tablets.

Steps to Reproduce:

1. Complete an order on <https://dk-staging.vercel.app/>
2. Navigate to the Order Confirmation page
3. Switch to iPad Air view using responsive mode in browser dev tools
4. Observe the layout of the “E-mail” label and the email address

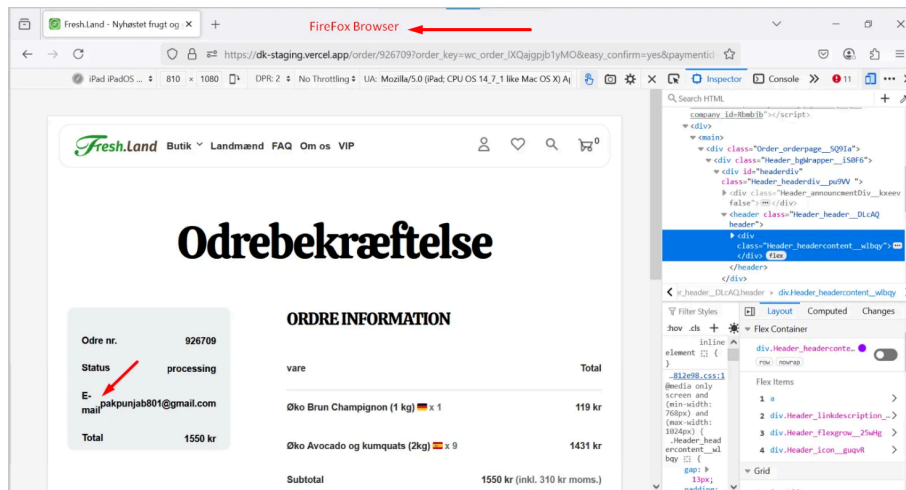

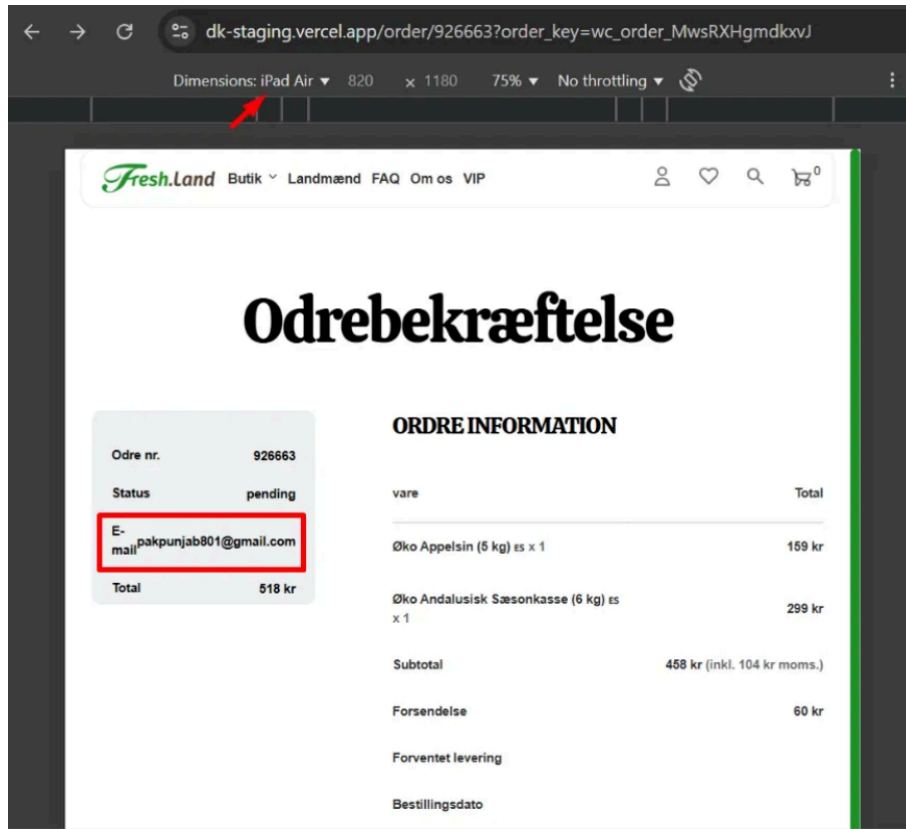

Website link:

<https://dk-staging.vercel.app/checkout>

Expected result:

The label and email text should be **well-aligned and readable**, even on tablet screen sizes like iPad Air.

Screenshot or video:

Bug 11: Subscription List Items Disappear When Toggling Status on Mobile View

Description:

On <https://dk-staging.vercel.app/>, in the **My Account** → **My Subscription** section, when accessed on a **mobile device**, clicking on the **Pending** or **Active** filter tabs causes the subscription list items to **disappear**. The content does not reload or render properly, preventing users from viewing their active or pending subscriptions.

Steps to Reproduce:

1. Log into your account on <https://dk-staging.vercel.app/>
2. Navigate to My Account → My Subscription
3. Switch to mobile view (e.g., iPhone 12) using browser dev tools
4. Tap on either Pending or Active tab
5. Observe the subscription list behavior

Website link:

<https://dk-staging.vercel.app/account>

Expected result:

Tapping the filters should **display the relevant subscription list items** based on the selected status (Pending, Active, etc.).

Screenshot or video:

<https://jam.dev/c/69cc4e4c-2e98-4e81-9052-ecb7e1ae5e91>

Bug 12: Multiple Responsive Issues on Real Android Device

Description:

While testing on a **real Android device**, multiple responsiveness issues were found across various screens on <https://dk-staging.vercel.app/>. These issues affect the visibility and usability of key interface elements.

Responsive Issues Identified:

1. Search Result Text: When performing a search, the search result text overlaps with the top header navigation bar, making it difficult to read. It should be clearly separated with proper spacing.
2. About Us Page – Hero Text: The main text: "Lead the green transition by directly connecting millions of farmers and consumers." does not fit properly on the mobile view, causing layout breakage or text being cut off. It needs to wrap and be fully visible on smaller screens.

Steps to Reproduce:

1. Open <https://dk-staging.vercel.app/> on a real Android mobile device
2. Test the language changer, search feature, and About Us page
3. Observe the layout issues described above

Website link:

<https://dk-staging.vercel.app/about>

<https://dk-staging.vercel.app/search/apple>

Expected result:

All UI elements should be **fully visible and responsive**, with no overlapping or hidden content on mobile devices.

Bug 13: Street name & Number dropdown does not return data

Description:

On the account-address page, if the user writes something in the input field, the dropdown does not show anything.

Website link:

<https://dk-staging.vercel.app/account#address>

Expected result:

The street name and number dropdown input field should display relevant data.

Screenshot or video:

<https://jam.dev/c/d630095d-0f69-43bc-9276-0ba4b122e81e>

Bug 14: Order completed page taking too much time to load after checkout

Description:

When the user completes the payment process and then after checkout, the order confirmation page is taking too much time to load.

Website link:

https://dk-staging.vercel.app/order/926678?order_key=wc_order_dew0RUeLhM7jk&easy_confirm=yes&paymentid=91ed8b61e3ad40fa972f1fcc0fba7f6a

Expected result:

Order confirmation page should load fast.

Screenshot or video:

Bug 15: Number Input Spinner Displayed on Firefox (Not on Chrome)

Description:

On Firefox browser, the **default number input spinner (up/down arrows)** appears on input fields such as the product quantity selector. However, in Chrome and other browsers, this spinner is hidden, which creates an inconsistency in the user interface across browsers.

Steps to Reproduce:

1. Open the website in Firefox.
2. Navigate to the Cart page.
3. Locate the quantity input field.

4. Observe the up/down spinner visible on the right side of the input box.
5. Open the same page in Chrome and observe the absence of the spinner.

Website link:

<https://dk-staging.vercel.app/cart>

Expected result:

- Number inputs should not display the default browser spinner unless specifically intended.
- Input appearance should be consistent across all modern browsers (Chrome, Firefox, Safari).

Screenshot or video:
